Design Thinking for Creativity and Collaboration

Leigh Wolf

Assistant Director of the MSU Hub for
Innovation in Learning & Technology

Time

2:30 - 3:30 pm
Wednesday,
March 1, 2017

Location

MSU HUB located at
D101
Wells Hall

Reservation is required

Design Thinking is an active problem solving process that can be applied across many different disciplines. This session will engage participants in a design thinking activity, which will lead to a discussion that will provide insight into how the process can be used. Leigh will also discuss ways design thinking processes have been used in curriculum development projects in the MSU Hub. Participants will consider how to employ similar methods in their own work with projects, students and teams.

Leigh Graves Wolf is teacher-scholar. Her work centers around online education, emerging technologies and relationships mediated by and with technology. She has worked across the educational spectrum from K12 to Higher to further and lifelong. She has been a disc jockey, network administrator, teacher, instructional technologist and now professor. She is currently the Assistant Director of the MSU Hub for Innovation in Learning & Technology, an academic specialist in the Dean's office in the MSU College of Education, and a fixed-term Associate Professor of Educational Technology at Michigan State University.
